BEAM is a simple metal shelf with a hidden space. A wooden beam slotted across its length adds another dimension to the shelf, making an area to display or store objects such as photos, postcards, and magazines. The wood adds warmth to the structure and hides the wall fixtures. BEAM helps you to organize your items with interesting layered compositions.

BEAM 木板層架，有別於一般壁掛層架，其木片隔板增加人們置物的使用彈性，增添溫潤的感受，且遮住了鎖牆螺絲結構。人們可擺放經常閱讀的書本、雜誌以及喜愛的海報、小物，呈現出具有層次感的實用陳列方式。
