70 L

**COLUMN provides a remedy for the clumsy appearance of public trash cans. The main body is a relatively slim elliptical column that can be seamlessly integrated into your space, whether against a wall indoors or out in the open outdoors. The inclined top and front cut-out design allow people to easily deposit trash and protect from wind and rain. All functions are appropriately integrated into the cylindrical body for a simple and minimalistic visual experience.**

顛覆以往公共垃圾桶較為笨重的視覺感受，以比例較為細長的橢圓柱當作桶身主體，不論在室內靠牆或在空曠的室外都能和諧的融入空間。頂端的斜面及正面的切口特徵同時滿足了投入口和頂蓋遮蔽室外風雨的功能，將所有功能恰如其分的整合在圓柱桶身之中，使外觀盡量單純，因此視覺感受也更加輕盈簡潔。
