## TRI

### Designer

Haowei Hsu

### Material

Steel

### Finishing

Powder Coating

### Texture

Fine Sand

### Capacity

10L fire extinguisher x 1

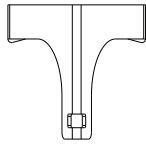

**TRI is a hook that allows fire extinguishers to hang neatly and stably. The solid triangular structure provides solid and reliable support, allowing the fire extinguisher to remain vertical naturally and not tilt left and right due to collision. It also ensures that the bottle body is maintained at an appropriate distance from the wall to avoid the problem of paint peeling due to friction with the wall.**

TRI 是一款能讓滅火器整齊且穩定懸掛的掛勾。以穩固的三角形結構提供堅實可靠的支撐，讓滅火器自然保持垂直狀態，不因碰撞而左右傾斜，同時確保瓶身與牆面維持適當距離，避免與牆面摩擦而掉漆的問題。
